

Dear Building Professional:

CFBS would like to announce the addition of some exciting products and product packages to our line.

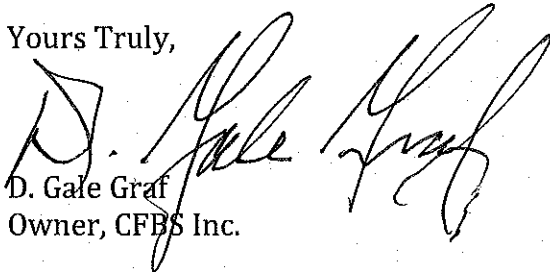

First is an assortment of dimensional stone--including marble, granite, travertine, limestone, slate, and onyx--that can be fabricated to meet the specific needs of your building project. We can help you choose the right stone, coordinate the production (including artistic creations such as mosaics and statuary), and arrange shipping and delivery to your site. In addition, as direct supplier representatives, not brokers, we can help you cut your costs for these products.

Along with stone, we are able to supply porcelain and glass tile, kitchen and bath fixtures, sanitary ware, and cabinets—all building blocks of first-rate, custom kitchen or bathroom design for your larger projects.

In addition to the individual items mentioned above, we are also happy to offer complete kitchen and bathroom packages for apartment complexes and hotel/motel buildings that can be replicated for cost effectiveness and delivered directly from the original sources for installation by the building contractor in charge. Included in these packages are the stone, tile, plumbing accessories, and cabinets that you choose from our wide assortment of options.

If you are interested in our new products or product packages and have not yet received a CD and literature containing further details, or if you would like to talk to one of our sales representatives, please contact us by emailing [dggraf@cfbsinc.com](mailto:dggraf@cfbsinc.com) or calling our toll-free number: 1-800-242-CFBS.

Yours Truly,

D. Gale Graf  
Owner, CFBS Inc.
